## 1 Section

This is a section, which is the highest level in an article.

### 1.1 Subsection

This is a subsection, which is one level below it. Notice the numbering of the subsection compared to the chapter and section.

#### 1.1.1 Subsubsection

This is a subsubsection, which doesn't appear in the table of contents and doesn't have a number, but gives a sensible way to separate text with a bold header.

## 2 Paragraph Text

### 3 Code Listings

Here is what a code listing looks like by default.

```
#include <stdio.h>

int main() {
    printf("Hello, World!\n");
    return 0;
}
```

### 4 Mathematics

Here are some sample mathematical expressions and equations, typeset properly.

$$\bar{x} = \frac{1}{n} \sum_{i=1}^n x_i$$

$$\frac{d}{d\theta} (\cos(\theta) + i \sin(\theta)) = -\sin(\theta) + i \cos(\theta)$$

$$= i(\cos(\theta) + i \sin(\theta))$$

## 5 Images

There is a command for including central images at the current location easily.

## 6 Plots

Plots are very easy to make using pgfplots:

## 7 Tables

Here is an example of a table as well:
